

VOLTHOCKEY

Speed, fun and joy with the VoltHockey chair.

VoltHockey is a specially-designed vehicle for indoor use, and primarily used to play VoltHockey. VoltHockey is a fun and exciting team sport for disabled children and youngsters with severe physical handicaps such as muscular dystrophy, quadriplegia, rupture of the spinal cord, osteoporosis and achondroplasia. You do not need to be a wheelchair-user to join in.

A hockey stick is mounted on the front of the cart. The player controls it and strikes using a joy stick. The ball is propelled by turning the cart. It can reach speeds of up to 15 km/hr and it can be adjusted to each player.

The game is played in 3 divisions, so everyone can participate no matter their level of proficiency.

The VoltHockey cart is available in 3 sizes. There are a number of options available for adjusting the chair including side supports, neck supports, cushions, respirator-holders, etc.

VoltHockey is played in over 50 clubs in Scandinavia and new clubs are being set.
